

Krika Mini

Krika One

Krika is the answer to one of the first questions of custom installers when delivering their installation. "The network is working... But how long for? How to make sure every device is still connected?"

Krika automatically lists all connected devices and displays collected information in a synoptic dashboard, accessible from any smartphone, tablet or computer. Select the devices you need to supervise and you will be alerted within 5 minutes via email or sms if any of them disappears from the network.

## KRIKA HELPS INTEGRATORS to be...

### Always Connected

Stay close and feel the heartbeat of your customers' installations

### Proactive

On the field to solve all issues even before the end user picks up his phone

### Technically sharper

View of all occurrences through cutting-edge analysis charts

### More efficient

Schedule the right technician with the right spare at the right moment

### Profitable

Offer profit-making service contracts
