This manual includes information needed when starting up and also instructions for frequently used operations. The Advanced Manual is published on the web for ecological reasons and has more detailed information and advanced settings.
Features

- Equipped with 7 ch amplifier
- Supports playback in Dolby Atmos format which provides 360-degree placement and movement of sounds including overhead sound
- Supports playback in DTS-X, which is DTS's next-generation object-based surround sound technology that includes height to deliver a fully-immersive listening experience to your living room
- Dolby Surround listening mode expands 2 ch, 5.1 ch or 7.1 ch source to available speaker configurations
- THX Select2 Plus certified
- Equipped with 4K compatible HDMI IN/OUT jacks
- Equipped with 2 HDMI output jacks
- Supports the HDMI Standby Through function which allows signal transmission from players to the TV in standby state
- Supports HDCP2.2, a strict copy-protection for providing high quality content (HDMI IN1 to IN3/HDMI OUT SUB)
- Supports ARC (Audio Return Channel)
- Supports USB storage playback
- Supports variety of network functions such as Internet Radio, DLNA, AirPlay etc.
- Equipped with a PHONO jack enabling connection with a turntable (Compatible with MM cartridges)
- Bi-Amping capability
- AV/Sync Function to correct deviation of audio and video
- Multi-zone function which allows you to play a different source in another room from the main room
- 32 bit DSP (Digital Signal Processor) with excellent calculation performance
- Music Optimizer™ for compressed digital music files
- Phase Matching Bass System
- Automatic speaker setup available using supplied calibrated microphone (AccuEQ Room Calibration)
- Supports playback of MP3, WMA, WMA Lossless, FLAC, WAV, Ogg Vorbis, Apple Lossless, DSD, Dolby TrueHD via network and USB storage device (the supported formats will differ depending on the use environment)

Refer to the back cover for supplied accessories.

Advanced Manual (on the web)

The Advanced Manual, published as an e-manual on the web, has more detailed information and advanced settings. The Advanced Manual is created in a format that makes it easy to read on a PC or Smartphone. The Advanced Manual has the following content:

- Details on AM/FM reception
- Playing Music Files on a USB Storage Device
- Listening to Internet Radio
- Playing Music with DLNA
- Playing Music Files in a Shared Folder
- Operating Music Files with the Remote Controller
- Listening Mode
- Advanced Settings (Setup Menu)
- Operating Other Components with the Remote Controller
- Advanced speaker connections
- Connecting and Operating Onkyo RI Components
- Control Function between the Unit and External Component
- Firmware Update
- Troubleshooting
- Reference Information

Advanced Manual found here
Front Panel

1. **On/Standby button**: Turns the unit on or into standby mode.
2. **Dolby Atmos indicator**: Lights when playing Dolby Atmos.
3. **DTS:X indicator**: Lights when playing DTS:X.
4. **Tone and Tone Level buttons**: Adjust the high tone and low tone.
5. **Remote control sensor**: Receives signals from the remote controller.
6. **Display**: Switches the information on the display.
7. **Listening Mode buttons**: Allow you to select the listening mode.
9. **Setup button**: Used when making settings.
10. **Cursor buttons, Preset button, Enter button**: Move the cursor and confirms the selection. When listening to AM/FM broadcasting, tune in to the station with Tuning or select the registered station with Preset.
11. **Return button**: Returns the display to the previous state.
12. **Master Volume**: Allows you to adjust the volume.
13. **Zone 2 button and Off button**: Controls the multi-zone function.
14. **Tuning Mode button**: Switches the tuning mode.
15. **Hybrid Standby indicator**: Lights if the unit enters standby mode when the HDMI Standby Through, USB Power Out at Standby or Network Standby function is enabled.
16. **Input selector buttons**: Switch the input to be played.
17. **Setup Mic jack**: The supplied speaker setup microphone is connected.
18. **Phones jack**: Stereo headphones with a standard plug are connected.
19. **AUX Input HDMI jack**: A HD camera or such other device is connected.
Rear Panel

1. **RI REMOTE CONTROL jack**: An Onkyo product with RI jack can be connected and synchronized with this unit.
2. **TUNER AM/FM (75Ω) terminal**: The supplied antennas are connected.
3. **USB port**: A USB storage device is connected so that music files stored in it can be played. USB devices can be supplied with power when connected with a USB cable.
4. **COMPONENT VIDEO IN jack**: Component video input jack.
5. **ETHERNET port**: Used for LAN connection.
6. **VIDEO IN jacks**: Composite video signals are input.
7. **RS232 port**: Connected to the home control system.
8. **IR IN A/B, IR OUT jack**: Connected to the multiroom remote control kit.
9. **12V TRIGGER OUT A/B/C jacks**: Allows you to connect a device with trigger input jack to enable power link operation between the device and the unit.
10. **HDMI IN/OUT jacks**: Digital video signals and audio signals are transmitted between the unit and the connected devices.
11. **HDBaseT™ IN/OUT ports**: HDMI input signals are output via the Ethernet cable. As they are covered with a seal when shipped, remove it when you use the ports. Do not use the ports to connect the Ethernet port of network device.
12. **SPEAKERS terminals**: Speakers are connected. To use the Multi-zone function, connect the speakers in the separate room to the ZONE2 speaker terminals.
13. **AC INLET**: The supplied power cord is connected.
14. **DIGITAL IN COAXIAL/OPTICAL jacks**: Digital audio signals are input.
15. **GND terminal**: The ground wire of the turntable is connected.
16. **PRE OUT jacks**: A power amplifier or subwoofer with built-in amplifier is connected.
Display

1. Lights in the following conditions. "Z2": Zone 2 output is on. / "HDMI": HDMI signals are input and HDMI input selector is selected. / "ARC": Audio signals are input from ARC compatible TV and TV input selector is selected. / "3D": Input signals are 3D. / "USB" (+): When input is "NET" and USB is connected and selected. / "NET" (+): "NET" input is selected and the unit is connected to the network. / "DIGITAL" - Digital signals are input and the digital input selector is selected. / Cursor indicators: NET or USB is controlled. *"USB" and "NET" will flash if the connection is not correct.
2. Stays lit when headphones are connected.
3. Lights when playing NET or USB.
4. Lights according to the type of input digital audio signals and the listening mode.
5. Stays lit when Music Optimizer is enabled.
6. Lights in the following conditions. "AUTO": Tuning mode is auto. / "TUNED": Receiving AM/FM radio. / "FM STEREO": Receiving FM stereo. / "RDS" (Australian models): Receiving RDS broadcasting.
7. Flashes when muting is on.
8. Lights in the following conditions. "SLEEP": Sleep timer has been set. / "ASb" (Auto Standby): Auto Standby is on. / "ch": Channel is being set. / "Hz": Crossover frequencies are being set. / "m/ft": Speaker distances are being set. / "dB": Speaker volume is being set.
9. Displays various information of the input signals. Pressing Display displays the type of input digital signals and the listening mode.
Step 1: Connections

1 Connecting speakers

Speaker layout

Important: The power cord must be connected only after all other connections are completed.

- Front speakers
- Center speaker
- Surround speakers
- Subwoofer
- Back speakers
- Height speakers (Front High)
- Height speakers (Rear High)

- 5.1 ch: 1 2 5 6 7 8 or 1 2 5 6 9 10
- 7.1 ch: 1 2 5 6 7 8 or 1 2 5 6 7 8 9 or 1 2 5 6 7 8 10

- 7 8 speakers, 9 10 speakers and 11 12 speakers share the same speaker terminals. Select either of the groups.

Characteristics of speaker types

1 2 output front stereo sound and 3 output center sound such as dialogs and vocals. 4 create back sound field. 5 reproduces bass sounds and creates rich sound field.

Connecting 7 8 speakers, 9 10 speakers or 11 12 speakers enables playback in 7.1 ch configuration. 7 8 (back) speakers improve sense of envelopment created by back sound field as well as seamlessness of back sounds, providing more natural sound experiences in the sound field.

9 10 or 11 12 (height) speakers produce surround effects on a height plane. This unit can perform optimal sound field processing for the type of height speakers actually installed and registered in “Initial Setup”.

Height speaker types

Installing speakers in ceiling

Ceiling speakers, etc. are used for maximizing effects in Dolby Atmos or Dolby Surround listening mode. Install Top Front speakers so that they are positioned at a point between directly above the listening position and directly above the front speakers. Install Top Middle speakers so they are directly above the listening position. Install Top Rear speakers so they are positioned at a point between directly above the listening position and directly above the back speakers. You can select (a)(b), (c)(d) or (e)(f) on the unit. For connection with the unit, use the SPEAKERS BACK or HEIGHT terminals.

Dolby Laboratories recommends placing the speakers as described in “Installing speakers in ceiling” to obtain the best Dolby Atmos effect.

Using Dolby Enabled Speakers

A Dolby Enabled Speaker is specially designed to be used as a height speaker. There are two types of Dolby Enabled Speakers; one type is designed to be placed on top of other speakers such as front speakers and surround speakers,
and the other type is designed to be integrated with normal speakers. Dolby Enabled Speakers placed with their diaphragms facing toward the ceiling create higher effect in the Dolby Atmos and Dolby Surround listening modes by providing sounds echoing off the ceiling. You can select (g) or (h) on the unit. For connection with the unit, use the SPEAKERS BACK or HEIGHT terminals.

When playing Dolby Atmos, the speakers required depend on how you have setup your back speakers or height speakers. The following shows combinations of speakers for reproducing Dolby Atmos.

</table>

*: Required, : Optional

*: Connection of a subwoofer is optional.

Important:
Connect speakers with 4 Ω to 16 Ω impedance. You have to change the setting if any of the speakers have 4 Ω or more to less than 6 Ω impedance. Using a speaker with less impedance than the setting may result in failure. You can set up by viewing the guidance displayed on the TV screen. Select the item with the cursor buttons of the remote controller and press Enter to confirm your selection. To return to the previous screen, press Return. Press RCV and then Setup on the remote controller. Select “2. Speaker” - “Configuration” - “Speaker Impedance” and change the default value from “6ohms” to “4ohms”.
Instructions on how to connect speakers

Cut and remove the plastic coating from the end of the speaker cable, twist the core and connect it to the terminal. Be sure to make correct connection between the unit’s jacks and speaker’s jacks (+ to + and - to -) for each channel. If connection is wrong, a bass sound may become poor due to reverse phase. Up to two subwoofers with built-in power amplifier can be connected to the SUBWOOFER jacks. Set the cut-off filter selection switch of the subwoofer to DIRECT. If the subwoofer does not have a cut-off filter selection switch but has a cut-off frequency adjusting dial, turn it to the maximum frequency. If your subwoofer does not have built-in power amplifier, you can connect a power amplifier between the unit and the subwoofer.

- The speaker setting is 7.1 channels at the time of purchase. You can change it manually or by using automatic speaker setting.
- Short-circuiting the + cable and - cable or contacting the cable core to the rear panel of the unit may cause failure. Also do not connect two or more cables to one speaker terminal or one speaker to several terminals.

When using commercially available banana plugs: tighten the speaker terminals to the end and then insert thebanana plugs. Do not insert the core of speaker cable directly into the hole for banana plug of speaker terminal. (North American models)
Step 1: Connections

2 Connecting the TV and players

HDMI cable connection

The unit has many HDMI jacks on its rear panel and each of them corresponds to an input selector button of the same name on the front panel. For example, a Blu-ray Disc player will be connected to the HDMI IN1 jack and the BD/DVD button on the front panel will be used to listen to the playback sound (if the player is CEC compliant, input will be switched automatically when play is started). If you add another Blu-ray Disc player, you can use any other jack than HDMI IN1. It is possible to change assignment of the input jacks and input selector buttons. For how to make settings, see the Advanced Manual.

To connect the TV and the unit, connect the HDMI OUT MAIN jack of the unit and the HDMI IN jack of the TV using a HDMI cable. With this connection, it becomes possible to display the setting screen of the unit on the TV or transmit video/audio signals from the player to the TV. If your TV supports ARC (Audio Return Channel), it is possible to play the TV sound with the AV receiver's speakers with this connection only. If your TV does not support ARC, you need, in addition to the HDMI OUT MAIN jack connection, a digital optical cable connection between the digital audio out optical jack of the TV and the DIGITAL IN OPTICAL jack of the unit or an analog audio cable connection between the audio output jack of the TV and the AUDIO IN TV jack of the unit.

Audio connection with a TV not supporting ARC

Select an appropriate connection for your TV.

The unit supports the HDMI Standby Through function that allows video and audio signal transmission from players to the TV even if the unit is in standby. You have to
modify the settings to enable the input selection link with CEC (Consumer Electronics Control) compliant device, connection with ARC compatible TV, and HDMI Standby Through function. See “2 Source Connection” of “Step 2: Initial Setup”.

- Another TV can be connected to the HDMI OUT SUB jack. However, only the HDMI OUT MAIN terminal supports CEC functions such as ARC.
- To enjoy HDCP2.2 protected video, connect the player to one of the HDMI IN1 to IN3 jacks and connect the unit and the TV via HDMI. You will be unable to view images protected by HDCP2.2 if your TV does not have a HDCP2.2 compatible input jack.
- To play 4K or 1080p video, use a high speed HDMI cable or high speed HDMI with Ethernet cable.

Connecting Components without HDMI

If your AV component does not have HDMI jack, use an available jack of your component for cable connection with this unit.

1. A player with a digital audio out jack can be connected.
   - Digital optical cable (OPTICAL)
     - As the digital in optical jack of the unit has a cover, push in the cable against the cover as it is turned inside.
   - Digital coaxial cable (COAXIAL)

2. A player with component video output jacks can be connected.
   - Component video cable
     - Its transmitted video has higher quality than that of composite video cable.

3. A player with a composite video output jack can be connected.
   - Composite video cable

4. A player with analog audio out jacks can be connected. When using jacks 2 and 3 for video input, connect to the audio input jacks corresponding to the jacks connected at 2 and 3. (For example, when video input connection is to the 2 BD/DVD jack, the audio input connection should also be to the 4 BD/DVD jacks.)
   - It is possible to change assignment of the input jacks and input selector buttons. For how to make settings, see the Advanced Manual.
   - To enjoy multi-zone playback with a player, connect player to either 1 or 4 jacks.
   - Analog audio (RCA) cable

5. Connect a turntable that uses an MM type cartridge and does not have a built-in audio equalizer. If the connected turntable has a build-in audio equalizer, connect it to the 4 Analog audio input jacks.
   - If it uses an MC type cartridge, install an audio equalizer compatible with MC type cartridge between the unit and the turntable by connecting it to the 4 analog audio input jacks. For details, refer to the turntable’s instruction manual.
   - If the turntable has a ground wire, connect it to the GND terminal of this unit. If connecting the ground wire increases noise, disconnect it.
AM/FM antenna connections
Connect the antennas to listen to AM/FM broadcast. When listening to the broadcast for the first time, adjust the antenna position and orientation to get the best reception.

Network connection
You can enjoy Internet radio, DLNA and AirPlay by connecting the unit to LAN. Connect the Ethernet cable to the Ethernet port of the router.

Headphones connection
Connect stereo headphones with a standard plug (1/4 inch or ø 6.3 mm) to the Phones jack on the front panel. Sound from the speakers will be off while you are using the headphones.
- If you selected any other listening mode than Stereo, Mono and Direct, connecting headphones will switch the listening mode to Stereo.

Power cord
This unit includes a removable power cord. Connect the power cord to AC INLET of the unit and then connect to the outlet. Always disconnect the outlet side first when disconnecting the power cord. When the unit is turned on, a large instantaneous current may flow affecting functionality of the computer and other devices, so it is recommended to use a separate outlet.
Step 2: Initial Setup

"Initial Setup" automatically starts on the TV when you first turn the unit on.

Before Start
Setup is performed as a series of responses to questions asked by the unit. Select the item with the cursors of the remote controller and press Enter to confirm your selection. To return to the previous screen, press Return.

- Switch the input on the TV to that assigned to the unit.

Settings proceed in the following order:

1. AccuEQ Room Calibration
   - Automatic calibration for optimum speaker settings

2. Source Connection
   - Checking that each input source is connected correctly
   - HDMI link function settings

3. Remote Mode Setup
   - Settings required to operate other AV Components with the Remote Controller

4. Network Connection
   - Checking network connections

* Firmware update notification: If the unit is connected via LAN and there is firmware update available, the "Firmware Update Available" message will appear. To execute updating, select "Update Now" with the cursor buttons of the remote controller and press Enter. When "Completed!" appears, press OOn/Standby on the main unit to turn the unit into standby mode. Then updating will be completed. (The unit automatically turns itself into standby mode after about 3 minutes even if you do not press OOn/Standby, and updating will be complete.)

1 AccuEQ Room Calibration

The test tone coming from each speaker will be measured to enable setting of the number of speakers, volume level, each speaker's optimum crossover frequencies, and distance from the primary listening position, and also enable correction of distortion caused by the room acoustic environment.

- You cannot return to the previous screen during speaker setup, even if you press Return.

1. Place the speaker setup microphone.

When the screen above is displayed, before starting the procedure, place the supplied speaker setup microphone at the measurement position by referring to the following figure.

- Correct measurement will not be possible if the microphone is held by hand. Measurement is not possible if headphones are being used.
Step 2: Initial Setup

1. Measurement may be interrupted if there is ambient noise or radio frequency interference. In this case, close the window and turn off the home appliance and fluorescent light.

2. After placing the microphone at the measurement position, select "Do It Now" with the cursors and press Enter.

3. When "Please plug microphone that came in a box with AV receiver" is displayed, connect the microphone to the Setup Mic jack of the unit.

4. Select the settings for the connected speakers, the type of the height speakers, and other appropriate settings.

5. The test tones sound from the connected speakers and automatic speaker setting starts. Measurement will be made 3 times or more for each speaker. It takes several minutes to be completed. Keep the room as quiet as possible during measurement. If any of the speakers do not produce the test tone, check for disconnection.

   - During measurement, each speaker outputs the test tones at a high volume. Be careful of sound leak that may disturb your neighbors, or be careful not to frighten young children.

6. When the measurement is completed, the measurement result is displayed. Press \(\text{\textlangle}}\) on the remote controller to check the settings. Press Enter with "Save" selected. To have the settings reflected for all the speakers, select "On (All Channels)" in the next screen and press Enter on the remote controller.

   - Select "On (Except Front Left / Right)" to disable just the front speakers.

   - If there is an error message, follow the on-screen instruction to remove the error cause. If the subwoofer was not detected, turn the volume of the subwoofer up to maximum and then select "Retry".

7. When "Please unplug setup microphone." is displayed, disconnect the microphone.

About THX playback
THX recommends setting the speakers manually if you use THX-certified speakers or playing back with THX listening modes.

- THX recommends setting the crossover frequency to "80Hz(THX)" manually.
- Due to the electrical complexities and the interaction with the room, you may notice irregular results when setting the level or distance of each speaker. If this happens, THX recommends setting the speakers and the subwoofer manually.

2 Source Connection

You can check the connections on the different inputs and make HDMI link function settings.

1. When the Source Connection start screen is displayed, select "Yes, Continue" with the cursors and press Enter.

2. Select the desired input to check the connection and press Enter.

   - If you select "No, Done Checking", you will proceed to step 5.

3. After checking the connection, select "Yes" with the cursors and press Enter.

   - If you select "No" and press Enter, the error cause will be displayed. Follow the guidance to remove the error cause and check the connection again.

4. Select "Yes" with the cursors and press Enter on the remote controller to check the connection of other inputs or select "No, Done Checking" and press ENTER to skip.

   - If you select "Yes", you will return to the screen of step 2.

5. Set the CEC link function.

   - Select "Yes" to enable the HDMI link function with CEC-compliant equipment, then select "Yes" again in the next screen.
Step 2: Initial Setup

The following CEC-compatible devices are found; do you wish to turn on the CEC link?

- Yes
- No

Source Connection
Exit SETUP

If you select “Yes”, the connection with ARC compatible TV and HDMI Standby Through function will be enabled.

Remote Mode Setup

Remote Mode Setup

Preprograming remote will give you control of other devices from AV receiver remote.

Would you like to setup your remote to control your devices? This may take a while depending on what and how many you have connected. You can always come back to remote setup from setup “7-2 Remote Mode Setup”.

- Yes, Continue
- No, Skip

Initial Setup
Exit SETUP

You can enable operation of the other components using the remote controller of the unit. When the Remote Mode Setup start screen is displayed, select “Yes, Continue” with the cursors and press Enter on the remote controller. Follow the guidance to select the desired Remote Mode button and in the keyboard screen, enter the first three characters of the brand name of the device you are going to program and search for the remote control code. The guidance will also explain how to set the remote controller.

Network Connection

Do you want to connect network connection?

It gives you network services that our AV receiver support. If you wish to skip this step, select “No, Skip”.

- Yes
- No, Skip

You can check the network connection. When the Network Connection start screen is displayed, select “Yes” with the cursors and press Enter on the remote controller. If you select “Yes” in the next screen, you can view the Ethernet cable connection status.

When connection is successful

“Successfully Connected.” is displayed on the screen.

If the screen is not displayed, try doing the setting again.

* Privacy policy

A confirmation screen asking you to agree to the privacy policy is displayed during network setting. Select “Yes” and press Enter to indicate agreement.

4 Network Connection

Audio output of connected players

To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to “Bitstream output” on the connected Blu-ray Disc Player or other device. Depending on the settings on the Blu-ray Disc Player, there may be cases when Dolby TrueHD, Dolby Atmos, and DTS-HD Master Audio is not output according to the format of the source.

In this case, in the Blu-ray Disc Player settings try setting “BD video supplementary sound” (or secondary sound) to “Off”. Change the listening mode after changing the setting to confirm.

Terminating initial setup

After finishing the initial setup, keep “Finished” selected and press Enter on the remote controller. Connection and setting of the unit is now complete.

Audio output of connected players

To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to “Bitstream output” on the connected Blu-ray Disc Player or other device. Depending on the settings on the Blu-ray Disc Player, there may be cases when Dolby TrueHD, Dolby Atmos, and DTS-HD Master Audio is not output according to the format of the source.

In this case, in the Blu-ray Disc Player settings try setting “BD video supplementary sound” (or secondary sound) to “Off”. Change the listening mode after changing the setting to confirm.
Step 3: Playing Back

1. Basic Operations

When using the remote controller to operate the AV receiver: The remote controller of this unit has the remote mode function for controlling other devices. You cannot control this unit when the remote controller is in the remote mode other than RECEIVER mode (for controlling this unit). Be sure to press 2 RCV to select the RECEIVER mode before starting operation.

1. Turning the power on.
   Press 1 Receiver on the remote controller to turn the power on.
   ● Switch the input on the TV to that assigned to the unit. Use the TV's remote controller.

2. Select the input on the unit.
   Press the 3 Input Selector button for the player you want to listen to. Press TV to listen to the TV's sound. You can also use the input selector buttons on the main unit.
   ● Input will automatically be selected if the TV or player is CEC compliant and connected to the unit with HDMI cable.

3. Select the desired listening mode.
   After pressing 2 RCV, press the 7 listening mode buttons to switch the mode so that you can enjoy different listening modes.

4. Adjust the volume with 11 VOL.

Part names and functions of the remote controller

1. Receiver button: Turns the unit on or into standby mode.
2. RCV button: Switches the remote controller to the mode for operating this unit.
3. Remote Mode/Input Selector buttons: Switch the input to be played. Furthermore, by registering a particular remote control code to a button, you can switch the remote control mode to operate other equipment by pressing that button.
   + Game2 button can not be used with this unit.
4. Zone2 button: For use when the unit is connected with a pre-main amplifier or speakers in a separate room and sound is played there.
   + Zone3 button can not be used with this unit.
5. Cursor buttons and Enter button: Move the cursor and confirms the selection.
6. Setup button: Displays the screen for making various settings for this unit.
7. Listening mode buttons: Allow you to select the listening mode.
   Movie/TV button: You can select a listening mode suitable for movies and TV programs.
   Music button: You can select a listening mode suitable for music.
   Game button: You can select a listening mode suitable for games.
   THX button: You can select a THX listening mode.
   ● For details on the listening modes, see the Advanced Manual.
8. Dimmer button: Switches the brightness of the display.
9. Custom button: You can register a preset code to enable operation of other devices. For how to make settings, see the Advanced Manual.
10. Muting button: Temporarily mutes audio. Press again to cancel muting.
11. Volume buttons: Allow you to adjust the volume. This button also cancels the muting.
12. Return button: Returns the display to the previous state.
13. Q button: Displays the Quick Setup menu that allows you to quickly access the frequently used setting items including sound quality adjustment.
14. Display button: Switches the information on the display.
2 Network Functions

You can enjoy sources such as Internet radio by connecting the unit to a network. For details on the operation, see the Advanced Manual.

- OSDs (the feature to show information such as setting menus on the TV) are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit.

- This unit needs to be connected to the same router as a computer or NAS device.

Home media

You can play music files in a shared folder on the computer or NAS device connected to the network. Select the server with the cursors, select the desired music file and press Enter to start playback.

- The unit needs to be connected to the same router as a computer or NAS device.

USB

You can play music files on a USB storage device. Connect the USB storage device to the USB port on the rear of the unit, select the desired folder or music file with the cursors, and press Enter to confirm and start playback.

- This unit needs to be connected to the same router as a computer or NAS device.

Internet radio services

The unit comes preset with Internet radio services such as TuneIn Radio. After selecting the desired service, follow the on-screen instructions, using the cursors to select radio stations and programs, then press Enter to play.

- Network services or contents may become unavailable if the service provider terminates its service.

DLNA

You can play music files stored in the computer or NAS device connected to the network. Select the server with the cursors, select the desired music file and press Enter to start playback.

- The AirPlay icon is displayed in the control center if you are using iOS 7 and later. To display the control center, swipe from the bottom of the screen of the iOS device.

- If the AirPlay icon is not displayed, confirm that this unit and the iOS device are both connected to the router correctly.

3. Play music files from an iPhone, iPod touch, or iPad.

- AirPlay is compatible with iTunes 10.2 or later.

- If "6. Hardware"-"Power Management"-"Network Standby" is set to on in the Setup menu, then once AirPlay starts, this unit turns on automatically and the "NET" input source is selected. Even if this setting is "Off", if the unit is already on then the "NET" input source can be selected.

- Due to the characteristics of AirPlay wireless technology, the sound produced on this unit may slightly be behind the sound played on the AirPlay-enabled device.

- There may be some differences in how operations are performed depending on the iOS or iTunes version.

- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit.

AirPlay®

You can enjoy the audio from iPhone®, iPod touch®, iPad® and PCs with iTunes.

Important: This unit needs to be connected to the network through the same router as the iOS terminal or PC.

- AirPlay is compatible with iTunes 10.2 or later.

- If "6. Hardware"-"Power Management"-"Network Standby" is set to on in the Setup menu, then once AirPlay starts, this unit turns on automatically and the "NET" input source is selected. Even if this setting is "Off", if the unit is already on then the "NET" input source can be selected.

- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit.

Volume: The volume of this unit and the AirPlay-enabled device are linked. Take care that the volume does not become too loud when you adjust the volume on the AirPlay-enabled device. You may damage the unit or the speakers. Stop play on the AirPlay-enabled device immediately if the volume becomes too loud at any point.
Step 3: Playing Back

4 AM/FM Radio

The Basic Manual explains the method using automatic tuning. For manual tuning, see the Advanced Manual.

1. Press Tuner on the main unit several times to select either “AM” or “FM”.
2. Press Tuning Mode on the unit, so that the “AUTO” indicator on the display lights.
3. Press Tuning↓ on the unit.
   The automatic tuning to a radio station starts. Searching stops when one is tuned. When tuned into a radio station, the “TUNED” indicator on the display lights. The “FM STEREO” indicator lights if the radio station is an FM radio station.

   FM 87.5 MHz ------- Actual display varies depending on the country or the region
   FM STEREO

Registering a radio station: You can register up to 40 of your favorite AM/FM radio stations.
1. Tune into the AM/FM radio station you want to register.
2. Press Memory on the unit so that the preset number on the display flashes.
3. Press Preset←→ on the unit several times to select a number between 1 and 40 while the preset number is flashing (about 8 seconds).
4. Press Memory again on the main unit to register the station.
   When registered, the preset number stops flashing.

To select a preset radio station, press Preset←→ on the main unit or CH +/- on the remote controller.

● To delete a preset station, after selecting the preset number you want to delete with Preset←→ on the main unit, press Tuning Mode while holding down Memory on the main unit. When the preset number is deleted, it disappears from the display.

AM/FM frequency step setting
It may be necessary for you to change the frequency step to tune the radio in your area. Change the step with the following procedure. Note that when this setting is changed, all radio presets are deleted.
1. After pressing RCV on the remote controller, press Setup.
2. Use the cursor buttons to select “6. Hardware” and press Enter.
3. Select “Tuner” with the cursor and press Enter.
4. Select “AM / FM Frequency Step” (North American models) or “AM Frequency Step” (Australian models) with the cursor and select the frequency step for your area.
5 Multi-zone

You can listen to audio in a room (called Zone 2) other than the one where this unit is located (called the main room).

Sources you can playback
- External players
- NET
- AM/FM Radio

*1 Only analog and 2ch PCM audio signals can be output to Zone 2.
*2 DSD and Dolby TrueHD audio signals cannot be output to Zone 2.

Important: Connection with external players
To listen to a player in Zone 2, you must connect using an RCA cable, a digital optical cable (OPTICAL), or a digital coaxial cable (COAXIAL). Some players may require audio output setting.

Making Multi-zone Connection
There are the following two methods of connection:

a. Connecting with a pre-main amplifier or a power amplifier in a separate room
b. Connecting with speakers in a separate room

a. Connecting with a pre-main amplifier in a separate room
It is possible to play 2 ch source in a separate room while 7.1 ch source is being played in the main room. Connect the PRE/LINE OUT ZONE2 jacks of the unit and the line-in jacks of the pre-main amplifier in a separate room with an RCA cable.

b. Connecting with speakers in a separate room
Connect the speakers in another room to the SPEAKERS ZONE2 jacks of the unit using speaker cables. Note that 5.1 ch will be the maximum (*1) in the main room during Zone 2 playback. No sound will be output from the back speakers and height speakers.

* In this case, the Dolby Atmos listening mode cannot be selected.

Settings are required in order to control volume and sound quality on this unit. To adjust it with the unit, press RCV and then Setup on the remote controller, select “3 Audio Adjust” - “Multi Zone” - “Zone 2 Out” and set the setting to “Variable”. If you connect a power amplifier, be sure to make the setting and adjust the volume on this unit.

These settings are required: After connecting the speakers, press RCV and then Setup on the remote controller, select “2 Speaker” - “Configuration” and set “Powered Zone2” to “Yes”.

En-18
Performing Multi-zone Playback

It is possible to perform playback in the main room and a separate room at the same time, for example by playing the Blu-ray Disc player in the main room where the unit is placed while playing Internet radio in a separate room. It is also possible to perform playback only in a separate room.

- With external players, it is possible to play the same source or different sources in the main room and separate room.
- You cannot select separate network services for the main room and another room with the "NET" input.
- When listening to AM/FM broadcasting, you cannot select different stations for the main room and separate room. Therefore broadcasting of the same station will be heard in the both rooms.

Playing Back

1. Press Zone2 on the remote controller, point the remote controller at the main unit and press Receiver. “Z2” lights on the main unit display and the multi-zone function is enabled. (Zone 2 is now on.)

2. Press Zone2 again on the remote controller and press Input Selector of the input to be played in a separate room.
   - If you turn the unit to standby during multi-zone playback, the Z2 indicator is dimmed and the playback mode is switched to playback in a separate room only. Performing steps 1 and 2 while the unit is in standby also switches the playback mode to playback in a separate room only. To play the same source in the main room and separate room, hold down Zone2 for approximately 3 seconds.

To control on the main unit: press Zone2 and within 8 seconds, press the input selector button of the source to be played in the other room. (To play the same source in the main room and separate room, press Zone2 twice.)

To adjust the volume on the main unit

To adjust the volume, press Zone2 on the remote controller and then adjust with VOL. Alternatively press Zone2 Level on the main unit. You can mute the sound by pressing Muting on the remote controller.

To adjust the sound quality on the main unit

As for the operation, press Zone 2 on the main unit and press Tone several times to display "Bass", "Treble" or "Balance" on the main unit display. Display the desired setting on the display and adjust it with + or −.

To turn off the function

After pressing Zone2 on the remote controller, press Off. Alternatively press Power on the main unit.

- If ZONE 2 is on, power consumption during standby becomes larger than normal.
- While Zone 2 is on, the RI linked system function (interlink between Onkyo components) is disabled.
- Pressing Input Selector on the remote controller while you are using the remote controller for Zone 2 will switch the controlled target to the main room. To control Zone 2 again, press the Zone2 button to enter the Zone control mode.

Quick Setup Menu

You can perform common settings on the TV screen while playing.

1. Press Q on the remote controller.
   The Quick Setup menu is displayed on the connected TV's screen.

<table>
<thead>
<tr>
<th>Quick Setup</th>
<th>MOVIE/TV</th>
<th>BD/DVD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio</td>
<td>MUSIC</td>
<td></td>
</tr>
<tr>
<td>HDMI</td>
<td>GAME</td>
<td></td>
</tr>
<tr>
<td>Information</td>
<td>THX</td>
<td></td>
</tr>
</tbody>
</table>

2. Select the item with the cursors of the remote controller and press Enter to confirm your selection.
   - To return to the previous screen, press Return.

3. Select the setting with the cursors buttons of the remote controller.

   - **Listening Mode**: Select the listening mode from the categories of "MOVIE/TV", "MUSIC", "GAME" and "THX". After selecting the Listening Mode, press Enter button to confirm.
     - It cannot be set when audio is played from the TV's speakers.
   - **Audio**: You can perform various audio settings including audio quality and speaker level adjustment.
     - You cannot select this item when audio is output from the TV's speakers.
   - **Bass, Treble**: Adjust volume of the front speaker.
     - It cannot be set if the listening mode is Direct or THX.
   - **Phase Matching Bass**: Suppress phase shift in the midrange to enhance bass sound. Thus smooth and powerful bass sound can be obtained.
     - It cannot be set if the listening mode is Direct or THX.
   - **Center Level, Subwoofer Level**: Adjust the speaker level while listening to the sound. The adjustment you made will be reset to the previous status when you turn the unit to standby mode.
     - Changes may not be possible depending on the settings in speakers.
     - This setting is not possible during Muting or when using headphones.
   - **A/V Sync**: If the video is behind the audio, you can delay the audio to offset the gap. Different settings can be set for each input selector.
     - It cannot be set if the listening mode is Direct.
   - **AccuEQ Room Calibration**: Enable or disable the settings made by automatic speaker setting. To enable them, you should normally select "On (All Ch)", and to disable just the front speakers, you should select "On (ex. L/R)". The setting can be separately set to each input selector.
     - This setting cannot be selected if the automatic speaker setting has not been performed.
     - It cannot be set if headphones are connected or the listening mode is Direct.
   - **Equalizer**: Assign the equalizer settings adjusted in "Setup"->"2. Speaker"->"Equalizer Settings" to "Preset1" to "Preset3". The same sound field setting is applied to all ranges when set to "Off".
     - It cannot be set if the listening mode is Direct.
Music Optimizer: Improve the quality of the compressed audio. Playback sound of lossy compressed files such as MP3 will be improved. The setting can be separately set to each input selector.
- The setting is effective in the signals of 48 kHz or less. The setting is not effective in the bitstream signals.
- It cannot be set if the listening mode is Direct.

Late Night: Make small sounds to be easily heard. It is useful when you need to reduce the volume while watching a movie late night. You can enjoy the effect only with Dolby Digital, Dolby Digital Plus, Dolby TrueHD, and DTS sources.
- Turning the unit to standby mode will set the setting to "Off". In case of Dolby TrueHD, the setting will be set to "Auto".
- The setting cannot be used in the following cases.
  - If "Loudness Management" is set to "Off" when playing Dolby Digital Plus or Dolby TrueHD.
  - When the input signal is DTS and "Dialog Control" is other than 0 dB.

Re-EQ, Re-EQ(THX): Adjust the soundtrack that was processed to enhance its treble, in order to make it suitable for home theater.
- This function can be used in the following listening modes: Dolby Digital, Dolby Digital Plus, Dolby TrueHD, Multichannel, DTS, DTS-ES, DTS 96/24, DTS-HD High Resolution Audio, DTS-HD Master Audio, DTS Express, DSD.
- In Re-EQ(THX), the following listening modes can be used: THX Cinema, THX Surround EX, and THX Select2 Cinema.

Center Spread: Adjust the width of the sound field of the front channel when playing in the Dolby Surround listening mode.
- To spread the width of the sound field to the left and right, set to "On". To concentrate sound in the center, set to "Off".
- This setting may be "Off" depending on the settings in speakers.

Dialog Control: You can increase the dialog portion of the audio in 1 dB steps up to 6 dB so that you can make dialog easier to hear over background noise.
- This setting is unavailable for content other than DTS:X.
- This setting may not be available for selection with some content.

Other useful functions

To adjust the sound quality
It is possible to enhance or moderate the bass and treble of front speakers. Press Tone on the main unit several times to select the desired setting from "Bass", "Treble" and "Phase Matching Bass", and adjust with +/-.
- It cannot be set if the listening mode is Direct or THX.
- "Bass": Allows you to enhance or moderate the bass.
- "Treble": Allows you to enhance or moderate the treble.
- "Phase Matching Bass": Allows you to keep the clear midrange and effectively enhance the bass.

Checking the Input Format
Press Display on the remote controller several times to switch the display of the main unit in order of:

- Input source & volume
- Listening mode
- Signal format (Audio)
- Sampling frequency
- Input signal resolution (Video)

If "Dolby D 5.1" is displayed in Signal format, the Dolby Digital 5.1 ch signals are being input. When listening to AM/FM radio, the band, frequency and preset number are displayed.

Playing Audio and Video from Separate Sources
It is possible to play audio and video from different sources. For example, you can play audio from the CD player and video from the BD/DVD player. In this case, press BD/DVD and then CD. Then start playback on the BD/DVD player and CD player. This function is effective when an input with audio only has been selected (CD, NET, TUNER or PHONO in the initial setting).

* When NET is selected, press Mode on the remote controller after pressing NET on the remote controller.
Troubleshooting

**Before starting the procedure**
Problems may be solved by simply turning the power on/off or disconnecting/connecting the power cord, which is easier than working on the connection, setting and operating procedure. Try the simple measures on both the unit and the connected device. If the problem is that the video or audio is not output or the HDMI linked operation does not work, disconnecting/connecting the HDMI cable may solve it. When reconnecting, be careful not to wind the HDMI cable since if wound the HDMI cable may not fit well. After reconnecting, turn off and on the unit and the connected device.

**The AV receiver turns off unexpectedly.**
- The AV receiver will automatically enter standby mode when Auto Standby or Sleep Timer is set and launched.
- The protection circuit may have been activated. If this is the case, when you turn the unit on again, "AMP Diag Mode" will appear on the main unit’s display. The unit will then enter a mode that detects abnormal conditions. If no problems are detected, "AMP Diag Mode" will disappear and the unit will return to a normal state. If "CHECK SP WIRE" appears on the display, the speaker cables may be short-circuited. Turn the unit off, and check to see if the cable core of any of the speaker cables is in contact with that of another speaker cable or with the rear panel. After that, turn the unit on again. If "NG" appears, unplug the power cord immediately and contact your dealer.

**There’s no sound, or it’s very quiet.**
- A wrong input selector button has been selected. Select a correct input for the player. Also check that muting is not on.
- Not all listening modes use all speakers.

**There’s no picture.**
- A wrong input selector button has been selected.
- To display video from the connected player on the TV screen while the unit is in standby, you need to enable HDMI Standby Through function.
- When the TV image is blurry or unclear, power cord or connection cables of the unit may have interfered. In that case, keep distance between TV antenna cable and cables of the unit.
- If you connect a player supporting HDCP2.2, be sure to connect it to one of the HDMI IN1 to IN3 jacks of the unit.

**Video and audio are out of synch.**
- Video may be delayed relative to audio depending on the settings and connections with your TV. Adjust in "Step 3: Playing Back", "6 Quick Setup Menu", "A/V Sync".

**Cannot play digital surround.**
- To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to "Bitstream output" on the connected Blu-ray Disc Player or other device.

**Cannot output audio such as Dolby Atmos according to the format of the source.**
- If you cannot output audio according to the format of the source (Dolby TrueHD, Dolby Atmos, DTS-HD Master Audio, etc.), in the Blu-ray Disc Player settings try setting "BD video supplementary sound" (or secondary sound) to "Off". Change the listening mode for each source after changing the setting to confirm.

**HDMI control does not function correctly.**
- Set the CEC link function of the unit to on. It is also necessary to make the HDMI linked system setting on the TV. See the TV’s instruction manual for details.

**Cannot access to network.**
- Try plugging/unplugging the unit or the router or check their power-on status. This will work well in many cases.

**Reseting the unit**
Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset.

- **How to reset the remote controller:**
  1. While holding down CBL/SAT, press Q until the remote indicator stays lit (about 3 seconds).
  2. Within 30 seconds, press RCV again.

- **How to reset:**
  1. While holding down CBL/SAT on the main unit (note that step 2 must be performed with this button pressed down)
  2. Press On/Standby on the main unit ("Clear" appears on the display and the unit returns to standby).
  - Do not unplug the power cord until "Clear" disappears from the display.
Specifications

Amplifier Section
Rated Output Power (North American)
With 8 ohm loads, both channels driven, from 20-20,000 Hz; rated 110 watts per channel minimum RMS power, with no more than 0.08% total harmonic distortion from 250 milliwatts to rated output.
Surround Mode Output Power (+)
6 ohms, 1 kHz THD 0.9% 175 W per channel

Precautions

For European Models

Declaration of Conformity

We declare, under our sole responsibility, that this product complies with the standards:

Safety

Limits and methods of measurement of radio disturbance characteristics

Limits for harmonic current emissions

Limitation of voltage changes, voltage fluctuations and flicker

RoHS Directive, 2011/65/EU

Hereby, Onkyo Corporation, declares that this DTR-40.7 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

C настоящим, Onkyo Corporation, декларирует, что DTR-40.7 в соответствии с существующими изложенными и дополнительными разпорядительными требованиями на Директиву 1999/5/EC.

Onkyo Corporation týmto vyhlasuje, že DTR-40.7 spĺňa základné požiadavky a všetky príslušné ustanovenia Smernice 1999/5/ES.

Underzeichnete Onkyo Corporation erklärte hervor, dass folgende udstyr DTR-40.7 overholder de væsentlige krav og øvrige relevante krav i direktiv 1999/5/EF.

Hiermit erklärt Onkyo Corporation, dass sich das Gerät DTR-40.7 in Übereinstimmung mit den grundlegenden Anforderungen und den übrigen einschlägigen Bestimmungen der Richtlinie 1999/5/EG befindet.

Käesoleval ajast Onkyo Corporation seadme DTR-40.7 vastavust direktiivi 1999/5/EÜ põhinõutetele ja nii mõturist tulevatele testiteist asjakohasteid saavat.

ME ΤΗΝ ΠΑΡΟΥΣΑ Ο ΚΑΤΑΣΚΕΥΑΣΤΗΣ Onkyo Corporation δηλώνει ότι DTR-40.7 έπληρωσε τα προβλεπόμενα και τα προσαρμοσμένα απαίτηση που αναφέρεται στην Οδηγία 1999/5/ΕΚ

Por la presente, Onkyo Corporation, declara que este DTR-40.7 cumple con los requisitos esenciales y otras exigencias relevantes de la Directiva 1999/5/EC.

Hierbij verklaart Onkyo Corporation dat het toestel DTR-40.7 in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG.

Con la presente Onkyo Corporation dichiara che questo DTR-40.7 è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti della direttiva 1999/5/EC.

Ar šo Onkyo Corporation deklarē, ka DTR-40.7 atbilst Direktīvas 1999/5/EK būtiskajam prasībām un citiem ar to saistītajiem noteikumiem.

Šiou Onkyo Corporation deklaruoją, kad šis DTR-40.7 atitinka esminius reikalavimus ir kitas 1999/5/EB Direktyvos nuostatas.

A Onkyo Corporation ezzennel kijelenti, hogy a DTR-40.7 típusú berendezés teljesíti az alapvető követelményeket és más 1999/5/EK irányelvben meghatározott vonatkozó rendelkezéseket.

Hierbij verklaart Onkyo Corporation dat het toestel DTR-40.7 in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG.

Niniejszym Onkyo Corporation deklaruje że DTR-40.7 jest zgodny z zasadniczymi wymaganiami i innymi właściwymi postanowieniami Dyrektywy 1999/5/EC.

Eu, Onkyo Corporation, declaro que o DTR-40.7 cumpre os requisitos essenciais e outras providências relevantes da Diretiva 1999/5/EC.

THX
Manufactured under license from THX Ltd. THX and the THX logo are registered in the U.S. and other jurisdictions. All rights reserved. Surround EX is a trademark of Dolby Laboratories. Used with permission. U.S. Pat. nos. 7,254,239 & 7,693,533 & 7,974,425 & 8,452,028 & 8,509,457 Taiwan Pat. I38671 European Pat. 1,360,874

THX Select2 Plus
Before any home theater component can be THX Select2 Plus certified, it must pass a rigorous series of quality and performance tests. Only then can a product feature the THX Select2 Plus logo, which is your guarantee that the Home Theater products you purchase will give you superb performance for many years to come. THX Select2 Plus requirements define hundreds of parameters, including power amplifier performance, and pre-amplifier performance and operation for both digital and analog domains. THX Select2 Plus receivers also feature proprietary THX technologies (e.g., THX Mode) which accurately translate movie soundtracks for home theater playback.

THX Re-Equalization and the “Re-EQ” logo are trademarks of THX Ltd.

HDMI
The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Made for
AirPlay, iPod, iPhone, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

iPad Air and iPad mini are trademarks of Apple Inc.

To apply these notices, the following notices to the Library are placed in each of the output files from the Library as the Library is used. These notices consist of a short form (—Option 1) or a long form (—Option 2) or both in any form that does not infringe the copyright of a party whose prior written consent has been obtained. The notices may be added to any portion of the output files as long as—Option 1 is used for portions of the Library derived from the Library and—Option 2 is used for portions of the Library that are not derived from the Library.

—Option 1: Source Code Notice

You may distribute the Library or any portion of it in any form, with or without modifications, and you may sublicense it to third parties, and you may distribute copies of it, and/or contribute it to a collaborative project, under the terms of this License. By doing so, you agree to ensure that these notices are reproduced appropriately in all copies of the Library or project, as the case may be. You must make sure that you have the right to distribute this Library in the manner you have chosen. You must not impose any other conditions on the recipients of the Library.

—Option 2: Source Code Notice

You may distribute the Library or any portion of it in any form, with or without modifications, and you may sublicense it to third parties, and you may distribute copies of it, and/or contribute it to a collaborative project, under the terms of this License. By doing so, you agree to ensure that these notices are reproduced appropriately in all copies of the Library or project, as the case may be. You must make sure that you have the right to distribute this Library in the manner you have chosen. You must not impose any other conditions on the recipients of the Library.

Supplied Accessories

- Indoor FM antenna --- (1)
- AM loop antenna --- (1)
- Remote controller (RC-901M) --- (1)
- Batteries (AA/R6) --- (2)
- Power cord --- (1)
- Speaker setup microphone --- (1)

* The number in parenthesis indicates the quantity. On packaging, the letter at the end of the product name indicates the color.

How to use the remote controller

- Batteries (AA/R6)

* If you do not use the remote controller for a long time, remove the batteries to prevent leakage.
* Note that keeping consumed batteries inside may cause corrosion resulting in damage of the remote controller.
